Table Grape Perfection

At IFG, we realize that finding the perfect table grape isn't just a matter of flavor and texture. For a grape variety to be perfect for you, it must grow well in your soil and climate, and must consistently return a superior profit margin to the growers and marketers.

This is why IFG has invested years developing cultivars that are becoming as well known for their resilience and adaptability as they are for their extraordinary fruit. We have added a unique world-wide licensing program that incentivizes production of high quality fruit to maximize fruit value and meet market demand.

IFG's focus on breeding table grape varieties to please consumers delivers increased growth and profitability for retailers and growers around the world. With its breadth of exciting flavors and shapes with a full spectrum of colors of grape varieties, IFG is creating a grape sensation for consumers who are discovering that good tasting grapes can be an important part of their nutritional plan.

FACTS

80+ acres of test fields and vineyards in Delano, CA, and 160 acres of test fields and research facilities at Fruitworks in McFarland

IFG exclusive breeding/research collaboration and partnership with University of Arkansas

More than one million flowers hand-picked and pollinated resulting in thousands of selections

48 patented table grape varieties

Active in 18 countries worldwide

~34,000 HA of IFG varieties planted worldwide

1,300+ table grape licensees

65+ dedicated staff worldwide

As of 2021, IFG is the world's largest table grape breeder

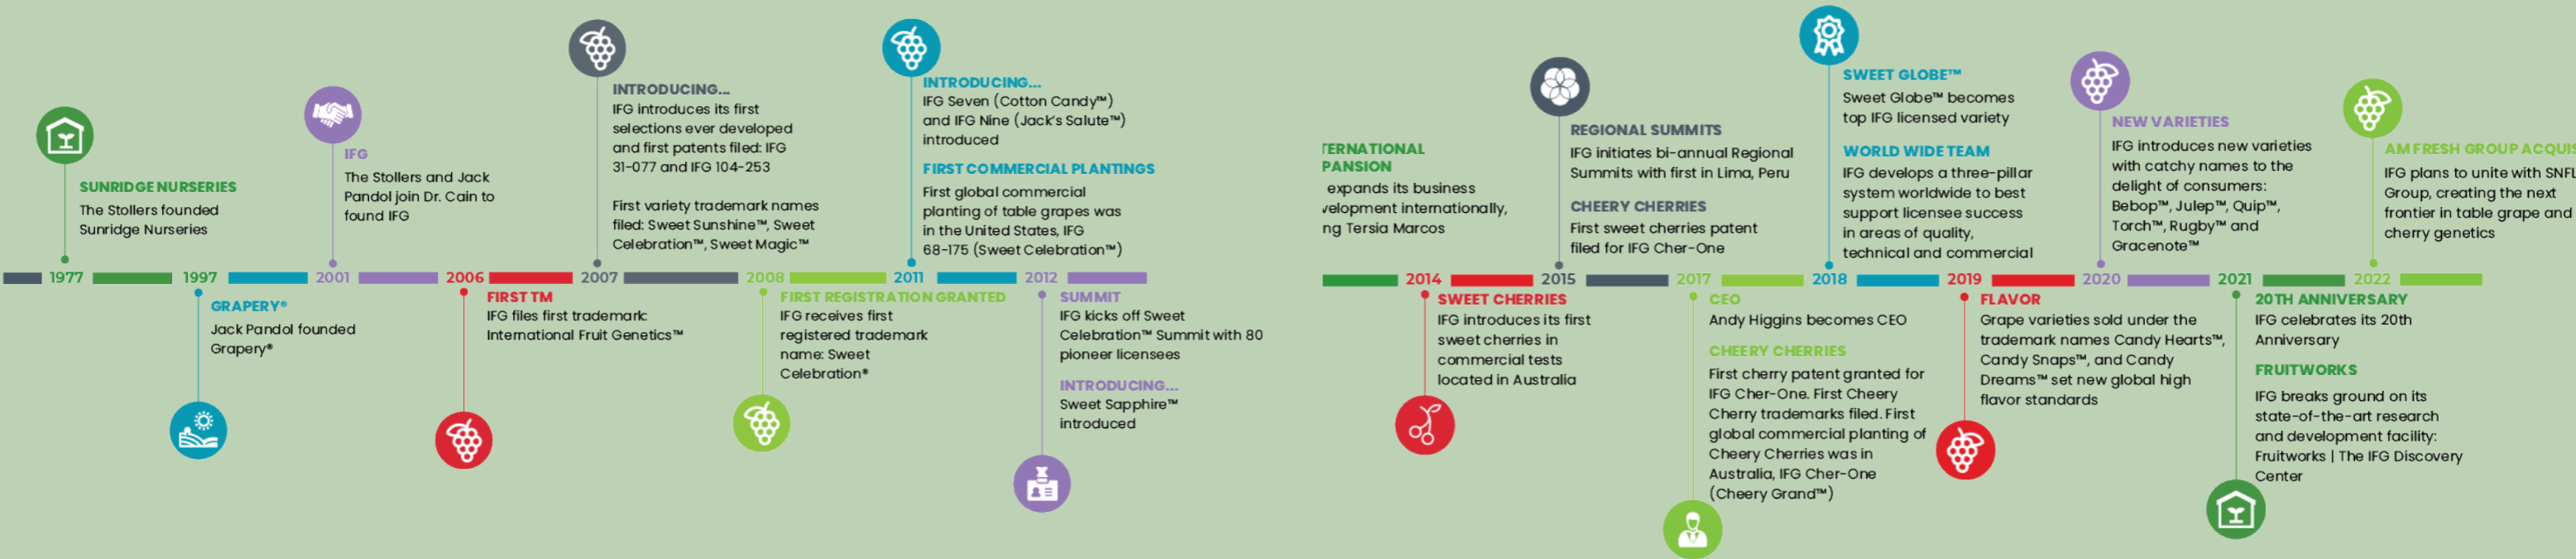

IFG TODAY

AN INTELLECTUAL PROPERTY COMPANY

Our story begins with Dr. David Cain's unique breeding technique developed early in his career that resulted in a portfolio of new table grape varieties with novelty flavors and exceptional quality for the marketplace.

Upon Dr. Cain's retirement in 2020, Dr. Chris Owens took the charge to lead IFG into the future. Dr. Owens joined IFG in 2016 and as the Lead Plant breeder, directs the development of improved varieties of table grapes and sweet cherries. He directs IFG's development efforts supporting the breeding program, including post-harvest evaluations, plant pathology, and genetics.

IFG TABLE GRAPE CATALOG

GROWING BETTER GROWING SMARTER

Since our inception in 2001, IFG has been guided by one simple but bold vision:

To be the leading provider of fruit varieties in the world, using natural breeding practices to provide consumers with an incredible eating experience.

IFG sets the pace as an innovator and global leader in its collaboration with licensed growers and key partners all over the world to help make our vision a reality. The global IFG family works with an eye on today and tomorrow to continue to inspire the fruit world by breeding new, vibrant, and flavor packed varieties to bring special and unique fruit to the markets.

LICENSEE SUPPORT IS CONSUMER FOCUSED

IFG's commitment to table grape excellence is bolstered by our three pillar system of support:

Commercial

Jennifer Maguire
International
Commercial Manager

IFG's Commercial team works in collaboration with our Quality Assurance, Technical and Research & Development teams to provide unparalleled levels of service to our licensees, and boost promotional efforts of IFG varieties, brands, and trademarks in the global marketplace. The team works to showcase IFG's varieties, working alongside retailers and licensed marketers globally to achieve feedback.

The Commercial team works on the business operations side, utilizing data integration and analytics processes to support IFG's licensing model and our licensee's ability to make confident decisions to expand in partnership with IFG. Our Commercial Managers monitor the table grape industry, assessing the market and opportunities within it, providing our Licensees with the best table grape expertise in the world.

Technical

Pietro Scafidi
International Technical
Manager

The scope of the IFG Technical Team is to provide tailored support to the licensed growers based on our knowledge of the IFG varieties in combination with the local growing conditions, in terms of climate, soil, labor availability/skills and final market targets. Collaboration with IFG Licensees in the vineyards is essential to achieving the best results for each table grape variety.

When a new table grape variety is introduced to a different environment, IFG's Technical team observes and studies them in order to define the most appropriate practices needed to achieve the best quality fruit in that region. Commercial field testing and experimentation is necessary to gain knowledge on each variety's potential. The IFG Technical team is fully involved with this process, from test block observations to semi-commercial trials. Each IFG grower is supported by a dedicated team who shares a global knowledge on how to grow IFG table grape varieties under different conditions.

Quality

Andrea Munoz
International Quality
Assurance Manager

The IFG Quality Assurance team's mission is to ensure our global network of Licensees produce consistent quality. Utilizing custom inspection reports, IFG is able to track fruit quality during the harvest season. Quality requirements are variety specific for individual regions and consider local growing conditions upon inspection. IFG works with our growers to maximize flavor and appearance to express the full potential of each variety.

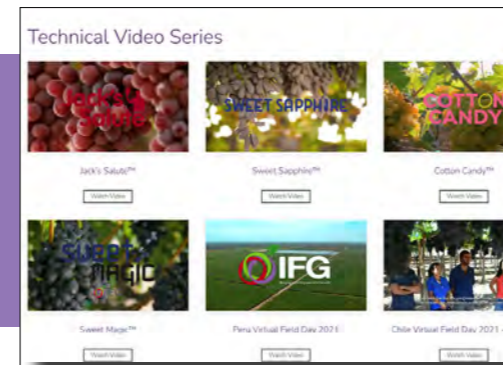

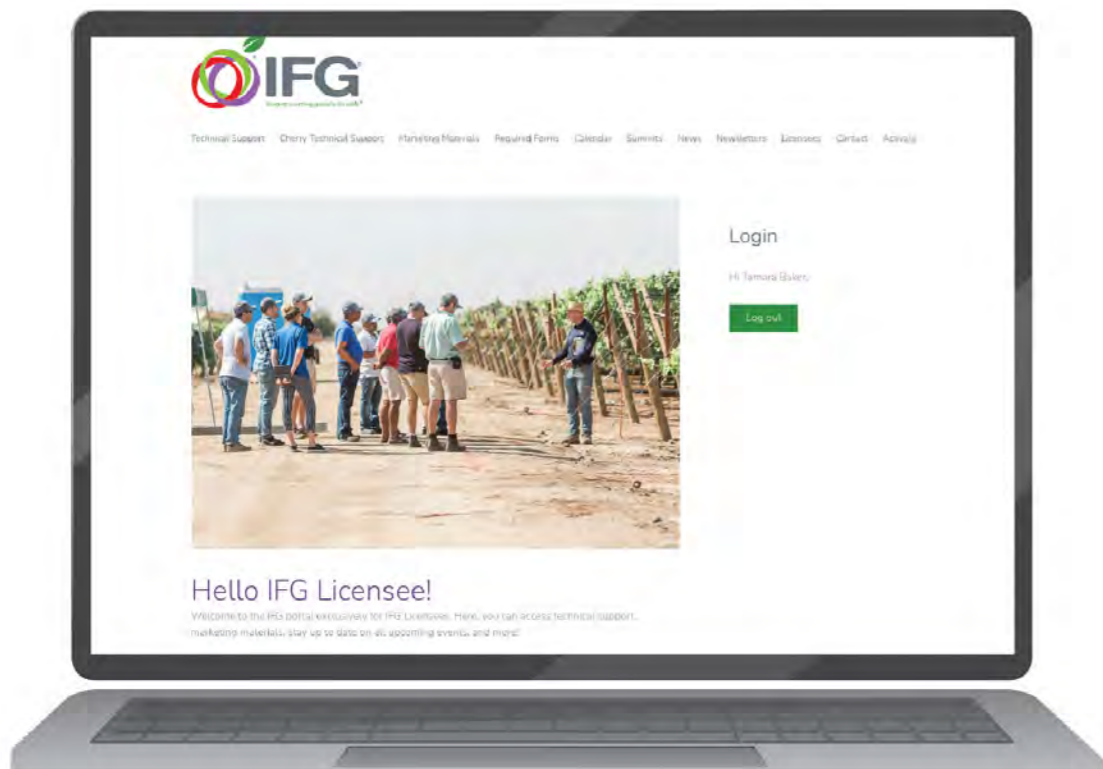

IFG has both internal and external resources in the main destination markets to understand and evaluate fruit on arrival to the final consumer. Our team visits importers and exporters to receive feedback, and visits retail stores to inspect fruit quality, monitor trademark compliance and labeling, as well as identify any illegal fruits through DNA testing.

IFG LICENSEE WEB PORTAL

How to Register:

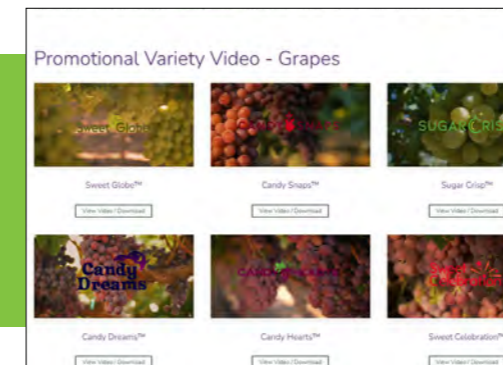

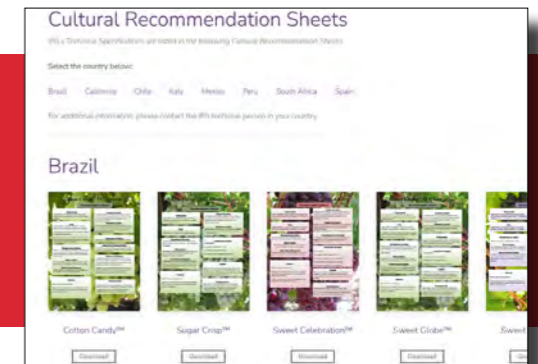

- 🍇 Go to ifg.world/licenses or ifg.world/retailers
- 🍇 Select "Create Account" at the bottom of the page
- 🍇 Fill in all required fields
- 🍇 Click on "Register" button to submit your request

All registrations will be screened prior to approval. Please allow 48 hours for approval from our webmaster.
